

A photograph of a dining area. The wall is covered in light-colored, horizontally-oriented wood planks. A glass pendant light with a single bulb hangs from the ceiling. In the foreground, a dark wooden table holds a white square plate with a salad of tomatoes, broccoli, and other vegetables, a pair of wooden chopsticks, a glass carafe of red wine, and a small white object. A window on the left shows a glimpse of the outdoors.

Wood Walls & Ceilings Designed for  
the Demands of High-Traffic Areas

A close-up photograph of a horse's dark coat and mane. The horse's hair is dark and appears to be blowing in the wind. The background is a soft, out-of-focus green, suggesting an outdoor setting. Two thin green horizontal lines are positioned above and below the text.

## *Beauty without compromise:*

Wood thin enough for  
ceilings and walls,  
but thick enough to  
bevel and miter.

---

Hardwood on walls and ceilings can create an amazing look in a commercial space, and when you use the thin Nydree engineered wood on these projects, you can achieve the look you want complete with beveled edges and mitered corners.

Our engineered wood is up to 300% harder than natural wood, and independent studies show that our finish surpasses that of all other wood when it comes to scratch and wear resistance, which is important if it is specified for a wall covering in high-traffic areas. Nydree engineered wood is more than a sliver of a species adhered to a slab of subfloor; it is substantial enough to be beveled or mitered to help you achieve the design you desire.

The image features a dark, monochromatic background with silhouettes of horses and riders. In the upper right, a horse is captured in mid-air, performing a high jump. Below it, a rider is seen in a crouched position, possibly preparing for a jump. In the lower left, a horse is galloping, with a rider leaning forward. The overall scene is set against a light, hazy sky, creating a high-contrast silhouette effect. Two thin, horizontal green lines are positioned above and below the main text.

Allsteel Showroom, Dallas, TX

A photograph of a wooden table in a room with a wood-paneled wall. On the table, there is a tall, thin glass lamp with a black base, a small glass vase containing a white lily flower, and a book with a colorful cover. A green rectangular frame is overlaid on the right side of the image, containing the text.

**Nydree products  
bring you:**

## **A lighter weight compared to other wood or tiles.**

---

That can make installation faster and easier.

## **The ability to bevel and miter to show the wood surface.**

---

This adds to the richness and authentic wood feel of your design without compromising.

## **Sound-control capabilities.**

---

This strong, sound-absorbing product can make for a more soothing experience for guests and tenants.

## **Lower life-cycle costs.**

---

Compared to traditional wood or tile, Nydree products are dramatically less expensive to own over the lifetime of the installation since they're infused with acrylic.

# **Avoid a specification failure.**

The success or failure of every specification you make lives on long after the project is complete. Product failures can damage a firm's reputation and become a financial disaster for a client. The true cost of a specification failure is not just in the replacement; many properties must close while the new product is installed, resulting in a significant loss of revenue. Specify Nydree and your clients (and your reputation) will thank you for years to come.

## THE POWER OF *choice*

---

With Nydree's Wall and Ceiling Woods, you can choose from a wide variety of colors, finishes and sizes.

# Nydree. Inspired. Empowered.

When our founder Barry Brubaker was a young boy, he lived in the rolling hills of Virginia near a historic farm that bred racehorses. The farm's name was Nydrie. Years later, Barry used that name as inspiration for his company and modified the spelling to Nydree, recalling the combination of performance and beauty that each horse on the farm embodied.

The company began in 2001 with the acquisition of Gammapar, and grew when it acquired its primary competitor, PermaGrain, in 2003. Today, Nydree is a company driven by a passion to create the best of the best in wood flooring and walls by fusing the properties of strength and style.

Many of the company's staff members have been here for generations, honing the craft of acrylic-infused wood. Using Nydree's proprietary technology, this team creates wood flooring and walls from multi-ply, marine-grade Baltic birch, marine-grade adhesives and a 1/10-inch-thick layer of acrylic-infused wood. We invented our manufacturing process in 1963, and we continue to perfect it every day. The result can be seen in hotels, stadiums, universities, stores, corporations, museums and other public spaces all over the world.

We invite you to learn more about the many products within our collections. Contact us today for samples or to discuss your projects and needs. Together, we can make a beautiful and lasting impact.

# Designed and Built in the USA

Sourced from the highest quality materials and wood species from around the world, Nydree flooring is designed, assembled and finished right here on US soil to create a product that's worthy of its reputation for superior performance, delivery and installation.
