NYDREE ACRYLIC INFUSED FLOORING LIMITED LIFETIME WEAR SURFACE AND STRUCTURAL DEFECT WARRANTY EXCLUSIONS. THESE WARRANTIES DO NOT COVER DISSATISFACTION OR PROBLEMS DUE TO:

1. Failing to follow the recommended installation and maintenance procedures specified and provided by Nydree Flooring. Installation and maintenance instructions are available from your dealer or from Nydree Flooring Customer Service, 1115 Vista Park Drive, Suites C&D, P.O. Box 289, Forest, Virginia 24551 USA. or from the web at www.nydreeflooring.com. While alternate adhesives and maintenance materials can be used with Nydree Flooring, we strongly recommend the use of Nydree SB1587 and Nydree Natural Floor Cleaner. When an alternate adhesive is used, any debonding or moisture-related issue associated with failure of the flooring falls back on that adhesive manufacture. Same goes with the use of alternate maintenance materials, any type of Pedestrian 2.0 finish failure will fall back on the maintenance material supplier.
2. Damage in use due to stains, scratches, gouges, cuts, indentations (heavy static point loads or high-heels), punctures, burns, accidents, discoloration (caused by tracking residue from carpet or vinyl dyes, painted or asphalt surfaces such as driveways), fading or discoloration from sunlight, excessive temperatures from radiant heating systems or any intentional misuse of product.
3. Excessive or improper sanding. Contact Nydree Flooring Customer Service for instructions before any sanding operations are performed.
4. Wear resulting from conditions other than normal residential or commercial pedestrian traffic.
5. Problems due to excessive moisture, alkaline substances, or hydrostatic pressure in subfloor.
6. Excessive wet damp mopping or floor flooding.
7. Using the flooring outdoors. Nydree Flooring is intended for interior use only.
8. Gloss reduction from use and the lack of walk-off mats at entry ways.
9. Color variation between samples and/or printed illustrations and actual product.
10. Splits, checks or cracks in the flooring from failure to keep installed flooring consistently above 30% relative humidity.

11. Debonding, buckling, or warping in the flooring from failure to keep installed flooring consistently below 55% relative humidity. Occasional spikes of relative humidity in the 55-85% range are acceptable, but every effort should be made to keep 30-55% relative humidity. (Use of AC and Dehumidifiers) Exception: Reclaimed Oak already has inherent splits and cracks that allow its use in an environment outside the recommended 30-55% relative humidity range.
12. Merchandise installed with obvious defects or not in architect/designer specifications for wood specie, color, width, grain, finish (gloss level) or pattern.
13. Knot holes, nail holes, worm holes, splits, heartwood, saw kerfs and colorful patina in Reclaimed Flooring.
