

Custom Color  
Wood Flooring  
for High-Traffic  
Commercial  
Spaces

Performance.  
Style.  
Strength.

---

up to 300% harder,  
*matched to  
your color.*

---

Imagine hardwood flooring that's infused with color and acrylic, designed to last up to three times longer than regular hardwood. That's what you'll get with Nydree: a wood floor specifically matched to any shade you specify, with a construction and finish that performs through the most high-traffic areas.

Nydree's acrylic-infused wood flooring is up to 300% harder than natural wood, and independent studies show that our finish surpasses that of all other wood flooring when it comes to scratch and wear resistance. And now it's available in custom colors to serve as a design element within any commercial setting.

At Nydree, our team includes in-house experts who are trained in custom color creation. They've made one-of-a-kind products for some of the world's most renowned design firms, including Gensler, WATG, Perkins+Will, HOK, and many more.

Thanks to our state-of-the-art color matching technology, designers can submit a paint, fabric or furniture swatch, or even a piece of art to specify a color. Talk to your local Nydree rep today, and you can start making your vision a reality.

**Nydree products  
bring you:**

## One-of-a-kind colors on demand:

---

For floors that complete the design of any space—if you can order it, we can do it—matching brand or concept colors across the spectrum.

## Durability in design:

---

With Nydree, you'll feel quality in every step. So even after thousands of high heels and years of spills, your floor will retain its integrity. Whether you need it for a few years or several decades, you can use it anywhere you want to avoid the chipping, splintering or denting you normally experience with regular wood flooring.

## Design flexibility:

---

Get creative: Nydree wood flooring is perfect for beveled edges, mitered walls and ceilings too. Nydree flooring can be used above, at or below grade. It can be glued to a variety of subfloors.

## Lower life-cycle costs:

---

Compared to natural wood, terrazzo or even commercial sheet vinyl, Nydree engineered wood flooring is significantly less expensive to own over the lifetime of the installation despite its higher initial cost. And since it's infused with acrylic, repair and refinishing costs are dramatically reduced compared to traditional wood flooring because it requires less care and virtually no replacement. Even if you choose the Handcrafted Collection or wire brush finish to give your design a worn feeling, it still will have superior performance.

# Avoid a specification failure.

The success or failure of every specification you make lives on long after the project is complete. Product failures can damage a firm's reputation and become a financial disaster for a client. The true cost of a flooring failure is not just in the replacement; many properties must close while the new floor is installed, resulting in a significant loss of revenue. Specify Nydree and your clients (and your reputation) will thank you for years to come.

A close-up photograph of a wire brush. The bristles are made of a light-colored, fibrous material, possibly wood or natural fibers, and are arranged in a dense, slightly irregular pattern. The background is a blurred, dark brown surface.

## THE POWER OF *choice*

---

With Nydree, you can opt for a classic smooth finish or a wire brush finish to draw out the subtle texture of the graining. Or, if you are looking for an aged look, our Handcrafted Collection delivers. A variety of patterns allows for a range of design possibilities, creating the foundation for a breathtaking environment.

Your design.

Your reputation.

Your client's brand.

**They all need  
a strong foundation.**

# Nydree. Inspired. Empowered.

When our founder Barry Brubaker was a young boy, he lived in the rolling hills of Virginia near a historic farm that bred racehorses. The farm's name was Nydrie. Years later, Barry used that name as inspiration for his company and modified the spelling to Nydree, recalling the combination of performance and beauty that each horse on the farm embodied. The company began in 2001 with the acquisition of Gammapar, and grew when it acquired its primary competitor, PermaGrain, in 2003. Today, Nydree is a company driven by a passion to create the best of the best in wood flooring and wood plank walls by fusing the properties of strength and style.

Many of the company's staff members have been here for generations, honing the craft of acrylic-infused wood. Using Nydree's proprietary technology, this team creates flooring and wall planks from seven plies of marine-grade Baltic birch, marine-grade adhesives and a 1/10-inch-thick layer of acrylic-infused wood. We invented our manufacturing process in 1963, and we continue to perfect it every day. The result can be seen in hotels, stadiums, universities, stores, corporations, museums and other public spaces all over the world.

We invite you to learn more about the many products within our collections. Contact us today for samples or to discuss your projects and needs. Together, we can make a beautiful and lasting impact.

# Assembled in the USA

Sourced from the highest quality materials and wood species from around the world, Nydree flooring is designed, assembled and finished right here on US soil to create a product that's worthy of its reputation for superior performance, delivery and installation.
