

A close-up shot of a green and white striped suitcase with silver wheels, resting on a light-colored wood floor. The suitcase is positioned in the upper left corner of the frame. The wood floor is made of wide planks with a natural grain pattern.

Wood Flooring Designed for the
Demands of High-Traffic Hotels

Performance.
Style.
Strength.

Leave the legacy of beautiful
design and superior finishes that
don't wear away over time.

Design an incredible hotel, and it will become a destination in its own right. While hotels are beautiful and exciting spaces, they take a lot of abuse from guests and staff alike. The trick to designing a spectacular hospitality experience lies in specifying materials that look as good five years later as they did on the day they were installed.

That's why you need strong, high-performance flooring. It's why you need Nydree. Our acrylic-infused engineered wood flooring is up to 300% harder than natural wood, and independent studies show that our finish surpasses that of all other wood flooring when it comes to scratch and wear resistance. That means your designs will stand the test of time.

Courtyard Marriott

Your design.
Your reputation.
Your client's brand.

**They all need
a strong foundation.**

**Nydree engineered wood flooring
brings you:**

Durability in design:

With Nydree installed in your hotel, you'll feel quality in every step. So after thousands of guests in heels, after countless wheeled carry-ons and luggage carts, the floors and wood-planked walls of your hotel will still retain their beauty. Whether you need it for a few years or several decades, use Nydree anywhere you want to dramatically reduce the chipping, splintering or denting you normally experience with regular wood.

Design flexibility:

Get creative; Nydree wood flooring is perfect for beveled edges, mitered walls and ceilings too. Nydree flooring can be used above, at or below grade. It can be glued to a variety of subfloors.

Nydree has in-house experts trained in custom color creation. Nydree's state-of-the-art color matching technology allows designers to submit a paint, fabric or furniture swatch to draw out a specific color to match a one-of-a-kind floor or wall.

Lower life-cycle costs:

Compared to natural wood, terrazzo or even commercial sheet vinyl, Nydree engineered wood flooring is significantly less expensive to own over the lifetime of the installation despite its higher initial cost. And since it's infused with acrylic, repair and refinishing costs are dramatically reduced compared to traditional wood flooring because it requires less care and virtually no replacement. Whether you choose the Handcrafted Collection or wire brush finish to give your design a worn feeling, your floor still will have superior performance.

Avoid a specification failure.

The success or failure of every specification you make lives on long after the project is complete. Product failures can damage a firm's reputation and become a financial disaster for a client. The true cost of a flooring failure is not just in the replacement; many properties must close while the new floor is installed, resulting in a significant loss of revenue. Specify Nydree and your clients (and your reputation) will thank you for years to come.

THE POWER OF *choice*

With Nydree, you can choose from a wide variety of colors, finishes and sizes to create a breathtaking destination.

Nydree. Inspired. Empowered.

When our founder Barry Brubaker was a young boy, he lived in the rolling hills of Virginia near a historic farm that bred racehorses. The farm's name was Nydrie. Years later, Barry used that name as inspiration for his company and modified the spelling to Nydree, recalling the combination of performance and beauty that each horse on the farm embodied.

The company began in 2001 with the acquisition of Gammapar, and grew when it acquired its primary competitor, PermaGrain, in 2003. Today, Nydree is a company driven by a passion to create the best of the best in wood flooring and walls by fusing the properties of strength and style.

Many of the company's staff members have been here for generations, honing the craft of acrylic-infused wood. Using Nydree's proprietary technology, this team creates wood flooring and walls from multi-ply, marine-grade Baltic birch, marine-grade adhesives and a 1/10-inch-thick layer of acrylic-infused wood. We invented our manufacturing process in 1963, and we continue to perfect it every day. The result can be seen in hotels, stadiums, universities, stores, corporations, museums and other public spaces all over the world.

We invite you to learn more about the many products within our collections. Contact us today for samples or to discuss your projects and needs. Together, we can make a beautiful and lasting impact.

Designed and Built in the USA

Sourced from the highest quality materials and wood species from around the world, Nydree flooring is designed, assembled and finished right here on US soil to create a product that's worthy of its reputation for superior performance, delivery and installation.
