

Wood Flooring Designed for
the Demands of Restaurants

Performance.
Style.
Strength.

up to
300% harder
than natural wood for restaurant use

Every square foot of a successful restaurant has to perform. From the kitchen to the bar to the most popular four-top, high traffic is a given. And the flooring and walls—they have to withstand everything from dragging chairs to the spill du jour.

That's why you need strong, high-performance flooring. It's why you need Nydree. Our acrylic-infused engineered wood flooring is up to 300% harder than natural wood, and independent studies show that our finish surpasses that of all other wood flooring when it comes to scratch and wear resistance. That means

A photograph of a restaurant interior. In the foreground, a dark wood floor with a horizontal grain pattern is visible. To the left, a white upholstered sofa is partially shown. In the background, a dining table is set with white chairs, glassware, and black napkins. A large, ornate wooden structure with a grid of metal studs is on the left wall. A green rectangular border frames the right side of the image.

Durability in design:

With Nydree installed in your restaurant, you'll feel quality in every step. So after thousands of guests in heels, after years of dropped trays and spilled drinks, the floors and the walls of your restaurant will still retain their integrity. Whether you need it for a few years or several decades, use Nydree anywhere you want to dramatically reduce the chipping, splintering or denting that can be expected from regular wood.

Get creative; Nydree wood flooring is perfect for beveled edges, mitered walls and ceilings too. Nydree flooring can be used above, at or below grade. It can be glued to a variety of subfloors.

Nydree has in-house experts trained in custom color creation. Nydree's state-of-the-art color matching technology allows designers to submit a paint, fabric or furniture swatch to draw out a specific color to match a one-of-a-kind floor or wall.

Compared to natural wood, terrazzo or even commercial sheet vinyl, Nydree engineered wood flooring is significantly less expensive to own over the lifetime of the installation despite its higher initial cost. And since it's infused with acrylic, repair and refinishing costs are dramatically reduced compared to regular wood because it requires less care and virtually no replacement. Whether you choose the Handcrafted Collection or wire brush finish to give your design a worn feeling, your floor still will have superior performance.

Avoid a specification failure.

The success or failure of every specification you make lives on long after the project is complete. Product failures can damage a firm's reputation and become a financial disaster for a client. The true cost of a flooring failure is not just in the replacement; many properties must close while the new floor is installed, resulting in a significant loss of revenue. Specify Nydree and your clients (and your reputation) will

Nydree. Inspired. Empowered.

When our founder Barry Brubaker was a young boy, he lived in the rolling hills of Virginia near a historic farm that bred racehorses. The farm's name was Nydrie. Years later, Barry used that name as inspiration for his company and modified the spelling to Nydree, recalling the combination of performance and beauty that each horse on the farm embodied.

The company began in 2001 with the acquisition of Gammapar, and grew when it acquired its primary competitor, PermaGrain, in 2003. Today, Nydree is a company driven by a passion to create the best of the best in wood flooring and walls by fusing the properties of strength and style.

Many of the company's staff members have been here for generations, honing the craft of acrylic-infused wood. Using Nydree's proprietary technology, this team creates wood flooring and walls from multi-ply, marine-grade Baltic birch, marine-grade adhesives and a 1/10-inch-thick layer of acrylic-infused wood. We invented our manufacturing process in 1963, and we continue to perfect it every day. The result can be seen in hotels, stadiums, universities, stores, corporations, museums and other public spaces all over the world.

We invite you to learn more about the many products within our collections. Contact us today for samples or to discuss your projects and needs. Together, we can make a beautiful and lasting impact.

Designed and Built in the USA

Sourced from the highest quality materials and wood species from around the world, Nydree flooring is designed, assembled and finished right here on US soil to create a product that's worthy of its reputation for superior performance, delivery
