

# The Nydree Story

Nydree  
FLOORING

---

Performance.

Style.

Strength.

---

Beauty with brawn: Nydree engineered flooring is up to 300% harder than natural wood.

Performance is dependable.  
Performance is enduring. And while performance appears effortless in its beautiful results, it is never easy to achieve. It takes practice, dedication and skill. It takes long hours, perseverance of body and mind, an uncompromising focus and a passion to be better than the very best.

At Nydree, we are here because every person we serve deserves the ultimate in performance. In turn, our acrylic-infused engineered flooring is up to 300% harder than natural wood, and independent studies show that our finish surpasses that of all other wood flooring when it comes to scratch and wear resistance.

**Nydree engineered wood  
flooring brings you:**

## Durability in design

---

With Nydree acrylic-infused engineered wood flooring, you'll feel quality in every step. So after thousands of guests visit your space, the flooring will still retain its integrity. Whether you need it for a few years or several decades, you can use it anywhere you want to dramatically reduce the chipping, splintering or denting you normally experience with regular wood flooring.

## Design flexibility

---

Get creative; Nydree wood flooring is perfect for beveled edges, mitered walls and ceilings too. Nydree flooring can be used above, at or below grade. It can be glued to a variety of subfloors.

Nydree has in-house experts who are trained in custom color creation and have created products for the world's most renowned design firms, including Gensler, WATG, Perkins+Will, HOK, and more. Nydree's state-of-the-art color matching technology allows designers to submit a paint, fabric or furniture swatch, or even a piece of art to draw out a specific color to match a one-of-a-kind Nydree floor or wall.

## Lower life-cycle costs

---

Compared to natural wood, terrazzo or even commercial sheet vinyl, Nydree engineered wood flooring is significantly less expensive to own over the lifetime of the installation despite its higher initial cost. And since it's infused with acrylic, repair and refinishing costs are dramatically reduced compared to traditional wood flooring because it requires less care and virtually no replacement. Whether you choose the Handcrafted Collection or wire brush finish to give your design a worn feeling, your floor still will have superior performance.

# Nydree. Inspired. Empowered.

When our founder Barry Brubaker was a young boy, he lived in the rolling hills of Virginia near a historic farm that bred racehorses. The farm's name was Nydrie. Years later, Barry used that name as inspiration for his company and modified the spelling to Nydree, recalling the combination of performance and beauty that each horse on the farm embodied.

The company began in 2001 with the acquisition of Gammapar, and grew when it acquired its primary competitor, PermaGrain, in 2003. Today, Nydree is a company driven by a passion to create the best of the best in wood flooring and walls by fusing the properties of strength and style.

Many of the company's staff members have been here for generations, honing the craft of acrylic-infused wood. Using Nydree's proprietary technology, this team creates wood flooring and walls from multi-ply, marine-grade Baltic birch, marine-grade adhesives and a 1/10-inch-thick layer of acrylic-infused wood. We invented our manufacturing process in 1963, and we continue to perfect it every day. The result can be seen in hotels, stadiums, universities, stores, corporations, museums and other public spaces all over the world.

We invite you to learn more about the many products within our collections. Contact us today for samples or to discuss your projects and needs. Together, we can make a beautiful and lasting impact.

# Designed and Built in the USA

Sourced from the highest quality materials and wood species from around the world, Nydree flooring is designed, assembled and finished right here on US soil to create a product that's worthy of its reputation for superior performance, delivery and installation.
